

62. (New) An isolated polynucleotide comprising a sequence having at least 90% identity with the entirety of the sequence of SEQ ID NO:808, wherein the polynucleotide can be used in the detection of cancer.

63. (New) An isolated polynucleotide comprising a sequence having at least 90% identity with the sequence of SEQ ID NO:808 or a fragment thereof comprising at least 50 residues, wherein the polynucleotide can be used in the detection of cancer.

64. (New) An isolated polynucleotide comprising a sequence having at least 90% identity with the sequence of SEQ ID NO:808 or a fragment thereof comprising at least 100 residues, wherein the polynucleotide can be used in the detection of cancer.

65. (New) An isolated polynucleotide comprising a sequence having at least 90% identity with the sequence of SEQ ID NO:808 or a fragment thereof comprising at least 400 residues, wherein the polynucleotide can be used in the detection of cancer.

66. (New) An isolated polynucleotide comprising the complement of a polynucleotide of any one of claims 61-65, wherein the polynucleotide can be used in the detection of cancer.

67. (New) An expression vector comprising a polynucleotide according to any one of claims 61-66.

68. (New) A host cell comprising an expression vector of claim 67.

REMARKS

Applicants respectfully submit the following remarks and request favorable reconsideration of the subject application. Claims 4-10 are pending in the application. Claims 4-10 have been cancelled and rewritten as claims 61-68 to more clearly recite the claimed subject matter. It is urged that support for the new claims may be found within the specification and
